EDUCATION

Florida International University Miami, FL
B.S. in Computer Science | GPA: 3.5/4.0 Expected Dec 2026
Dean's List: Fall 2024–Spring 2026

TECHNICAL SKILLS

Languages: Python, SQL, Java, HTML, CSS
Data & Analytics: pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, Looker, QuickSight
Platforms & Development: AWS S3, SageMaker, Azure SQL Database, PostgreSQL, Appscript, Git, GitHub

EXPERIENCE

BBVA Peru | Data & Analytics Enable Summer Intern May–Aug 2026
- Consolidated organizational, training, and AI-usage data to support internal analytics initiatives and reporting.
- Built dashboards and reports using Excel, Looker, and QuickSight; validated automated processes against business rules.
- Used AWS S3 and SageMaker to support analytics and data workflows.

Florida International University | Math Lab Learning Assistant Oct 2024–Present
- Tutored students in calculus and foundational mathematics, translating complex concepts into step-by-step explanations.

SELECTED PROJECTS

GridLock | Transmission Coordination Platform Sep 2026
React, Leaflet, Python, FastAPI, PostgreSQL
- Co-developed a platform to explore 166 transmission projects across 2 utilities: Dominion Energy and Georgia Power.
- Converted PDF and spreadsheet records into structured JSON for backend integration, retaining source references and uncertainty flags so project details could be traced to their origin.
- Developed project-comparison and opportunity-review views using a 25-mile screening radius to surface nearby projects and scheduling uncertainty for coordination review.

Spotify Track Data Analysis Jan 2025
Python, pandas, Matplotlib
- Cleaned and analyzed 100,000+ songs to examine relationships between popularity, danceability, and tempo.
- Visualized audio-feature patterns and presented findings through charts and dashboards.

BBVA Summer Internship | AI Adoption Analytics May–Aug 2026
Tool: Excel | Methods: Logistic Regression, Segmentation
- Consolidated employee, GPT/Gemini usage, and training data for approximately 3,022 employees; screened 56 variables for leakage, redundancy, and data quality.
- Applied logistic regression and segmented analysis to identify adoption factors across age, training, roles, and leadership.
- Presented targeted training and engagement recommendations to address a 7-percentage-point gap between 28% adoption and the 35% annual target.

E-commerce Analytics Pipeline In progress
Azure SQL Database, Python, SQL, Power BI
- Integrated 3 public DummyJSON datasets covering products, carts, and users into a cloud-based analytics workflow.
- Developed 5 SQL scripts to build staging, dimension, and fact tables, organizing source data into an analytical model for sales, product, and customer reporting.

LEADERSHIP & AWARDS

- HSI Battle of the Brains: Independently built the team's web application during a 24-hour case competition; team earned 1st place in the technology category among 18 universities.
- ALPFA | Tech Group Analyst (Jan 2024–May 2025): Helped organize technical workshops, including Python programming and data-analysis sessions.

Languages: English (fluent), Spanish (native)
